NAVVIS
A SURROUND CARE COMPANY

Proven Performance in Episodes of Care. Accelerating Your Success in CJR-X.

Navvis has more than a decade of experience helping health systems design, operate, and achieve high performance in episode-based payment programs.

CJR-X will reward organizations that can effectively manage performance across the full episode of care. Success requires more than analytics. It requires operational discipline, physician alignment, care coordination, post-acute network management, and financial oversight working together in a coordinated model.

Navvis brings over a decade of experience supporting health systems and hospitals participating in CJR, BPCI, BPCI-Advanced, TEAM, Cardiac Episode Payment Models, Medicare Advantage, and commercial bundled payment programs. Through program administration, care redesign, episode management, and performance improvement, Navvis helps health systems strengthen the capabilities most critical to success in CJR-X.

20+
Health Systems Supported
Across CJR, BPCI, BPCI-Advanced, TEAM, and other bundled payment programs.

32,000+
Episodes Managed Annually
Across orthopedic, cardiac, and medical episode populations.

10-30%+
Episode Cost Reduction
Achieved across bundled payment programs.

$15M+
Savings Delivered
Through episode management, care redesign, and performance improvement.

Experience That Matters

Navvis has supported health systems through bundled payment programs with hands-on operational management, care redesign, analytics, physician alignment, and episode performance improvement. We were one of only 12 original BPCI facilitator organizations and our experience spans CJR, BPCI, BPCI-Advanced, TEAM, Cardiac Episode Payment models, Medicare Advantage, and commercial bundled payment arrangements. Our solutions are customizable to leverage your capabilities, while enabling you to benefit from our deep expertise. We provide detailed assessments, CJR-X playbooks, capabilities for gainsharing, post-acute care management, reporting, and analytics to support high performance in CJR-X.

CLIENT PARTNERS

Bayhealth®
BEACON HEALTH SYSTEM
Beebe Healthcare
Hunterdon Health
ORLANDO HEALTH®
PARRISH MEDICAL CENTER
PARKVIEW HEALTH
RWJBarnabas HEALTH

Includes organizations recognized by CMS as high-performing participants in bundled payment programs

Proven Through Performance

Navvis partners have achieved significant measurable improvements in both financial and clinical performance

↓50%	↓30%	↓26%+	↓36%
Reduction in readmissions	Reduction in SNF	Reduction in hospital length of stay	Reduction in SNF length of stay

Results were driven through standardized care pathways, proactive episode management, care coordination, discharge planning, and post-acute optimization strategies directly relevant to CJR-X success.

More Than Advisory Support

Navvis supports and operates bundled payment programs day-to-day. Our teams bring experience across episode analytics, care pathway design, patient management, care coordination, gainsharing, post-acute network management, quality reporting, compliance, and program administration.

How Navvis Helps Health Systems Succeed in CJR-X

Navvis helps health systems move from assessment to action by aligning the capabilities that most directly influence episode performance.

ASSESS

Evaluate readiness, performance opportunities, physician alignment, post-acute utilization patterns, and operational capabilities.

DESIGN

Develop care strategies, governance structures, gainsharing approaches, performance metrics, and post-acute optimization plans.

ENABLE

Implement workflows, reporting, care coordination, physician engagement, and episode management processes.

IMPROVE

Monitor performance, identify variation, evaluate post-acute utilization, and support continuous improvement through ongoing reviews.

CORE CAPABILITIES

Episode Performance Management
Track episode performance, financial trends, benchmarks, and reconciliation to identify improvement opportunities.

Physician Alignment
Engage physicians through governance, gainsharing, performance transparency, and aligned accountability.

Analytics & Performance Reporting
Deliver dashboards, trend analysis, and actionable insights to focus leaders on the highest-value opportunities.

Technology Enablement
Connect data, workflows, and reporting tools to support episode management in the client environment.

Care Management & Coordination
Support patient navigation, care transitions, and longitudinal episode oversight to reduce avoidable utilization.

Post-Acute Care Optimization
Improve discharge planning, network performance, and post-acute utilization across the full episode.

Program Operations
Build the operating model, governance, workflows, and change management needed to sustain performance.

Implementation Support
Translate readiness findings into practical workplans, roles, timelines, and execution support.

Start with a Navvis CJR-X Readiness Assessment

Gain a clearer view of your organization's readiness, identify performance opportunities, and build a roadmap for success under CJR-X.
